Professional Summary

Dynamic and detail-oriented web developer with a strong foundation in front-end and back-end technologies. Proficient in JavaScript, Node.js, and MongoDB, with experience in designing and developing scalable, user-centric web applications. Skilled in leveraging Express.js and RESTful APIs for seamless integrations and efficient workflows. Possesses a solid background in Python and machine learning, enhancing problem-solving and data-driven decision-making abilities.

Education

Charotar University of Science and Technology
B.Tech in Computer Engineering
Anand, India | GPA: 8.66/10.00 | August 2023 - May 2026

Dr. Subhash Technical Campus
Diploma in Computer Engineering
Junagadh, India | GPA: 9.66/10.00 | June 2020 - August 2023

Projects

- **JobPortal** Tools: Node.js, Express.js, MongoDB, RESTful APIs

  - Developed a full-stack job portal platform with a responsive frontend using React and a robust backend with Node.js and Express.js.

  - Implemented secure user authentication and role-based authorization for job seekers and employers.

  - Utilized MongoDB to manage user profiles, job postings, and application tracking efficiently.

- **Automated Reel Maker** Tools: Python, Flask, React.js, Cloud Storage, FFmpeg

  - Built a web application allowing users to upload videos and automatically add specified music tracks.

  - Integrated a cloud-based storage system for seamless file management and retrieval.

  - Implemented a search feature to fetch music tracks and an editor to align music with video duration.

  - Utilized FFmpeg for video and audio processing, ensuring high-quality output.

Skills

Programming Languages: JavaScript, Python, SQL
Web Technologies: HTML5, CSS3, Node.js, Express.js
Database Systems: MySQL, MongoDB
Cloud Technologies: AWS
Development Tools: Git, VS Code
Specialized Areas: RESTful API Development, Full-Stack Architecture
Machine Learning Knowledge: Supervised/Unsupervised Learning, Data Analysis with Python (pandas, NumPy, scikit-learn)

Hackathons
